C10 REGULAR CABS

STANDARD SPECIFICATIONS

(See Blue Tab Section for Specification Details)

Series	C10
Engine	
Base Equip.	4.1 Liter, 250 2-bbl L6
Clutch	11"; 124 sq. in.
Air Filter	Oiled-paper Element
Oil Filter	Throwaway Type
Exhaust System	Single; Aluminized
Emission Control Systems	See Engine & Cooling Section for specific model applications
Suspension, Front	Independent; Coil Springs
Capacity	2950 lb.
Springs @ Ground	1475 lb. ea.
Shock Absorbers	25mm dia.
Suspension, Rear	Salisbury Axle; Hypoid Drive; Two-stage Multi-leaf Springs
Axle Capacity	3750 lb.
Axle Ratio	2.73
Springs @ Ground	1550 lb. ea.
Shock Absorbers	25mm dia.
Brakes	Hydraulic; Self-adjusting
Front	Disc; 11.86" Rotor
Rear	Drum; 11" x 2"
Booster	—
Parking	Cable to Rear Wheels
Electrical	12 Volt; Negative Ground
Battery—Freedom Type	315 CCA♦ @ 0°F.
—Reserve Capacity	75 min. @ 80°F.
Delcotron Generator	37 amp.
Frame	Carbon Steel; 36,39,000 psi
Section Modulus	3.10
Fuel Tank (nominal capacity)	
—117.5" WB	16 gal.
—131.5" WB	20 gal.
Steering Gear Type	Manual; Recirculating Ball Gear
Linkage	Parallelogram
Transmission	Fully Synchronized 3-Speed Manual
Shift Location	Steering Column
Tires	(5) FR78-15B Radial (4PR)
Wheels	(5) Disc 15" x 6"

♦CCA-Cold Cranking Amps

PICKUP

SILVERADO MODEL OPTION — RPO YE9 (FOR REGULAR CAB MODELS)

This option includes all items in the Cheyenne model option plus the additions or substitutions listed below

EXTERIOR

- **Bright Appearance Items:**
"Silverado" nameplates, with series designation, on front fenders

Chrome-trimmed grille and headlamp bezels
Chevrolet emblem at grille center
Body side and rear moldings with black paint trim (Fleetside models with single rear wheels only)
Wheel-opening lip moldings with black paint trim (Fleetside models with single rear wheels only)

- **Special Headlamps:** Rectangular; dual RH and LH

INTERIOR

- **Bright Appearance Items:**
"Silverado" nameplate on instrument panel pad
Trim on instrument cluster bezel, on instrument panel pad applique and on door trim panels
- **Cowl Trim:** Color-keyed molded plastic on entire surface of cowl side panels
- **Door Trim Panels:** Special color-keyed molded plastic with bright brush-finished upper decorative inserts having bright, black, and silver borders; vinyl inserts in armrest area; vinyl stowage pockets; door closing assist straps; plus carpeting and bright trim strips on lower portions
- **Instrument Cluster:** Voltmeter, oil pressure gage, and engine temperature gage replace warning lamps; includes bright brush-finished bezel
- **Instrument Panel Pad Applique:** Bright brushed finish with bright, black, and silver trim
- **Visor Mirror:** On RH sun visor

PICKUP SEATS

**STANDARD
FULL-DEPTH FOAM SEAT**

Molded polyurethane foam pads over a steel cushion spring and frame assembly and a backrest frame assembly provide resilient support for driver and passengers, with an extra-thick pad employed for the cushion. A folding type backrest with inertia latch is used for the Regular Cab front seat and Crew Cab rear seat, providing convenient access to the stowage area behind the seat. Front seats are adjustable fore and aft. Trim is durable, easy-to-clean vinyl.

FRONT BUCKET SEATS

This option for Regular Cabs consists of two high back bucket-type seats with foam padding and special all-vinyl trim or cloth and vinyl trim plus a center console with spacious stowage compartment. The color-keyed textured plastic console includes storage/beverage pockets. Option includes carpeting on floor and lower portion of cab rear panel and extra-thick full floor insulation.

PICKUP

SILVERADO MODEL OPTION—RPO YE9 (FOR CREW CAB AND BONUS CAB MODELS)

This option includes all items in the Scottsdale model option plus the additions or substitutions listed below

Crew Cab model shown

- **Insulation:** Extra-thick insulators for entire front and rear compartment floor areas, except under rear portion of Bonus Cab floor mat. NOTE: Includes the standard extra-thick insulators for the front portion of the rear compartment
- **Seats:** Choice of: 1) all-vinyl leather grain trim; or 2) cut pile velour cloth/vinyl trim. See Interior and Exterior Color Selection Chart for color availability
- **Steering Wheel:** Bright trim on horn button
- **Visor Mirror:** On RH sun visor

PICKUP

CHEVY SPORT OPTION—RPO Z77 (FOR REGULAR CAB 117.5" WB FLEETSIDE MODELS)

This option includes all items in the Scottsdale Model Option plus the additions or substitutions listed below

EXTERIOR

- **Bumpers:** Front and rear with resilient black impact strips; front bumpers painted primary body color and rear bumper painted secondary body color
- **Grille and Headlamp Bezels:** Painted dark argent with bright Chevrolet emblem at center of grille
- **Hood Ornament:** Bright, with "CHEVY SPORT" lettering
- **Special ZY6 Two-Tone Paint:** Delete body side moldings regularly included in Scottsdale Model Option (see chart below)
- **Special Headlamps:** Dual rectangular; RH and LH
- **Sport Striping:** Color-coordinated decal striping in rainbow effect on front fenders, cab and pickup body sides and tailgate, with "CHEVY SPORT" lettering over rear wheel openings (see chart below for available exterior/interior/striping color combinations)

INTERIOR

- **Carpeting:** Color-keyed
- **Insulation:** Extra-thick insulators for entire floor area

PICKUP

CHEVY SPORT OPTION—RPO Z77 (FOR REGULAR CAB 117.5" WB STEPSIDE MODELS)

This option includes all items in the Scottsdale Model Option plus the additions or substitutions listed below

EXTERIOR

- **Bumpers:** Front and rear; front bumper painted primary body color and rear bumper painted secondary body color; front has resilient black impact strips
- **Grille and Headlamp Bezels:** Painted dark argent with bright Chevrolet emblem at center of grille
- **Hood Ornament:** Bright, with "CHEVY SPORT" lettering
- **Special ZY6 Two-Tone Paint:** (see chart on preceding page)
- **Sport Striping:** Color-coordinated decal striping in rainbow effect on front fenders, cab body sides, rear fenders and tailgate, with "CHEVY SPORT" lettering on rear fenders (see chart on preceding page for available exterior/interior/striping color combinations)
- **Special Headlamps:** Dual rectangular; RH and LH

INTERIOR

- **Carpeting:** Color-keyed
- **Insulation:** Extra-thick insulators for entire floor area

PICKUP

STANDARD CAB FEATURES

Curved Windshield—The large, one-piece windshield of laminated safety glass has an area of approximately 1447 square inches for excellent visibility.

Rear Window—The rear window is of solid safety glass with a 790 square inch area.

Electric Windshield Wipers—High-capacity, 2-speed motor provides constant wiping action regardless of engine load or accelerator position. Wipers have 16-inch blades. Wiper arms and the metal portions of the blades have a matte finish. Electric washers with a 3-pint capacity reservoir are also standard. Dual orifice washer nozzles assure efficient washing action.

Drip Moldings—Bright metal moldings over side doors.

Flow-Through Power Ventilation—With ignition switch on and heater fan switch on, outside air enters the cab through the louvers in the cowl air intake grille between the hood and the windshield—away from road

dust, heat and fumes. The air passes through screened inlets into a plenum chamber built into the cowl, where water is separated from the air and drained out. Air enters the driver compartment through the heater (or optional air conditioning) system and exits through a pressure relief valve in each door. Additional air may be admitted into the interior through two inlets—one on the right side (except with optional air conditioning) and one on the left side of the lower cowl structure. Inlet valves are operated by levers integral with the inlet assemblies.

Ventipanes and Curved Side Glass—Additional flow of outside air can be controlled by a pivot-type ventipane in each front door. Friction-type latches with push-button locks and smoothly contoured handles assure excellent sealing and security. Ventipanes, as well as curved door windows, are of solid safety glass with an area of 546 square inches for each side. (Crew Cab and Bonus Cab rear side door glass area—488

sq. in. each.)

Rearview Mirrors—Standard chrome exterior mirrors are of the fixed arm type with 5-7/16" wide x 4" high adjustable heads. Both right-hand and left-hand units are provided.

Many optional mirror combinations are also available. See the Optional Equipment listing for each model.

Door Locks—All cab models include left & right hand key-operated (front) door locks as standard equipment. Depression of inside pushbuttons prevents accidental front and rear door opening and provides keyless front door locking when leaving the vehicle. Door lock key is separate from the ignition key for theft protection.

Identification and Clearance Lights—All models with second unit bodies 80" wide or over, or models with dual rear wheels, are equipped with cab identification and clearance lights. See individual model specification pages.

PICKUP CAB CONSTRUCTION

CAB MOUNTINGS

Typical Cab Mount shown.

Both front and rear cab mounts used are the compression-rebound type for quietness and durability.

INSTRUMENT CLUSTERS

Standard Cluster with warning lights for engine temperature, generator, and oil pressure.

Optional Cluster (RPO Z53) with volt-meter, engine temperature gage, and oil pressure gage. Included in Silverado model option (RPO YE9) along with bright brush-finished trim, as illustrated. Cluster faceplate for Custom Deluxe (Std.) models and Scottsdale model option (RPO Z62) has black crackle finish. A silver crackle finish is used for the Cheyenne model option (RPO Z84). An electric clock (RPO U35), shown at lower left, or a tachometer (RPO U16) is available for use with the optional cluster. When the optional tachometer is ordered, it replaces the regular fuel gage (right center), and another fuel gage is added in the clock provision.

Optional air conditioning outlets and radio also shown in illustration.

The smooth interior walls of the Stepside pickups are a full 50 inches apart, allowing 4-ft-width materials to be carried easily. In fact, with the 98" body, 4' x 8' sheets can be carried without lowering the tailgate.

Floors are constructed of kiln-dried, sealed wood boards with seven flush steel skid strips bolted in place over the expansion joints. A tight-fitting full-width tailgate minimizes loss of bulk loads such as grain or sand. With the tailgate closed, the wedge-type anti-rattle latches give extra support to the side panels. When open, the tailgate is supported by two strong vinyl covered chains.

On each side of the body, Stepside pickups have a running board and step just forward of the fender. This step is a great convenience in jobs requiring frequent working of the

load from the side.

Reinforced pockets (2" x 1.38") for the addition of stake racks are provided to increase the bulk carrying capacity of the box. On 6.5 ft. bodies there are 2 pockets on each side and on 8 ft. bodies there are 3 pockets on each side. See the diagram at left above for location of these stake pockets.

Side panels, tailgate, and front panel are fabricated of 2-side galvanized steel as are the platform cross sills and skid strips.

All metal body panels are primed for corrosion protection, and the Elpo electro-coating process is used to prime the side panels, tailgate, and front panel to assure that all surfaces of these more complicated components—even surfaces not visible—receive a coat of prime paint.

Convenient Side Step

A convenient running board and step on each side of the body facilitates working of cargo from the side.

Steel Skid Strips

Seven flush steel skid strips hold floor planks securely, yet allow expansion with changes in temperature and humidity. Recessed bolt heads prevent cargo damage in loading and unloading.

Fleetside pickup boxes feature double-walled construction in the side panels and tailgate to prevent load dents from marring the appearance of the outer panels.

All metal body panels are primed for corrosion protection, and the Elpo electro-coating process is used to prime the side panels, tailgate, floor panel, and front panel to assure that all surfaces of these more complicated components—even surfaces not visible—receive a coat of prime paint. Side outer panels and tailgate are fabricated of zinc coated steel and galvanized steel is used for stake pockets, platform panels, and rear wheel housings to provide additional corrosion protection.

A tight-fitting full-width tailgate holds such loads as grain and sand with minimal loss. It is operated by a mechanically actuated latch and retained in the horizontal position by hinged steel support straps. A quick-release feature allows it to be quickly and easily removed and re-installed by one person. The tailgate latch features one-hand operation for easy opening and closing.

Reinforced pockets (2" x 1.38") for the addition of stake racks are provided to increase the bulk carrying capacity of the box. On 6.5 ft. bodies there are two pockets on each side; on 8 ft. bodies there are three pockets on each side. See the diagram at right above for location of these stake pockets.

PICKUP

FLEETSIDE PICKUP BOX

DUAL REAR WHEEL APPLICATION

Body Ordering Code E63

DIMENSIONS

"BIG DOOLEY"

The 8-foot Fleetside Pickup Box for dual rear wheel application offers all the features described for single rear wheel application. Additionally, it includes one-piece fenders constructed of fiberglass reinforced plastic bolted to each rear wheelhouse area. This provides an extension to cover the dual rear wheel equipment. Clearance lights are located fore and aft of the wheel openings on the fender extensions. Installation also includes five amber clearance and identification lights mounted on the cab roof along with five red rear marker lamps mounted on the tailgate.

Fleetside Pickup Box (Code E63) and dual rear wheels (RPO R05) are available only on models CC30903, CK30903, CC30943, or CK30943.

Dana wider track rear axle used when dual rear wheels are ordered on Fleetside pickups.

PICKUP

SOLID AND TWO-TONE* EXTERIOR COLOR COMBINATIONS

The application of paint for solid and two-tone exterior color combinations is shown below.

SERIES 10-30

All Pickup models may be ordered with solid color or Conventional two-tone paint treatment. Special and Deluxe two-tone paint treatments plus an Exterior Decor Package that includes a custom two-tone paint treatment also are available for single rear wheel Fleetside Pickups.

SOLID PAINT—ZY1

SOLID COLOR

Solid color paint (ZY1) is standard on all models. All painted areas of the cab, front end sheet metal, and box are the same color. White paint is applied to the raised "Chevrolet" lettering on the tailgate, except with Frost White, then black paint is applied. (A bright trim plate covers the lettering on Fleetside models when the Cheyenne or Silverado Model Options are ordered.)

SOLID PAINT—ZY1

CONVENTIONAL TWO-TONE—ZY2

Secondary Body Color

CONVENTIONAL TWO-TONE

Conventional two-tone (ZY2) consists of the secondary color on cab roof and cab back panel above the belt line, with the elected primary color on the remainder of the cab, on the front end sheet metal, and on the pickup box. White paint is applied to the raised "Chevrolet" lettering on the tailgate, except when the primary color is Frost White, then black paint is applied. (A bright trim plate covers the lettering on Fleetside models when the Cheyenne or Silverado Model Options are ordered.) Includes cab back panel applique and molding, except with the Cheyenne or Silverado Model Options where it is already included.

CONVENTIONAL TWO-TONE—ZY2

Secondary Body Color

Primary Body Color

Primary Body Color

SPECIAL TWO-TONE PAINT—ZY3

FLEETSIDE ONLY
(Includes YG1 and B96 Moldings)

Primary Body Color

Secondary Body Color

SPECIAL TWO-TONE

Special two-tone (ZY3) paint colors are available only on single rear wheel Fleetside Pickup models and include the YG1 molding package consisting of black vinyl body side and rear moldings with bright trim, bright wheel opening moldings, and bright trim for front side marker lights and tail lights (except with the YG3 molding package or the Silverado Model Option where bright body side and rear moldings with black paint trim are substituted). The primary color is applied to the areas above the moldings (including the cab roof). The secondary color is applied to the areas below the moldings. White paint is applied to the raised "Chevrolet" lettering on the tailgate, except when the primary color is Frost White, then black paint is applied. (A bright trim plate covers the lettering when the Cheyenne or Silverado Model Options are ordered.)

PICKUP

SOLID AND TWO-TONE* EXTERIOR COLOR COMBINATIONS

The application of paint for solid and two-tone exterior color combinations is shown below.

DELUXE TWO-TONE PAINT—ZY4 FLEETSIDE ONLY (Includes YG1 and B96 Moldings)

DELUXE TWO-TONE

Deluxe two-tone (ZY4) paint colors are available only on single rear wheel Fleetside Pickup models and include the YG1 molding package consisting of black vinyl body side and rear moldings with bright trim, bright wheel opening moldings, and bright trim for front side marker lights and tail lights (except with the YG3 molding package or the Silverado Model Option where bright body side and rear moldings with black paint trim are substituted). Also includes cab back panel applique and molding (except with Cheyenne or Silverado Model Options where it is included). The cab roof, cab back panel above the belt line, and the area below the moldings are painted the secondary color with the primary color applied on all other areas. White paint is applied to the raised "Chevrolet" lettering on the tailgate, except when the primary color is Frost White, then black paint is applied. (A bright trim plate covers the lettering when the Cheyenne or Silverado Model Options are ordered.)

DELUXE TWO-TONE PAINT—ZY4 FLEETSIDE ONLY (Includes YG1 and B96 Moldings)

EXTERIOR DECOR PACKAGE—ZY5 FLEETSIDE ONLY (Includes YG1 and B96 Moldings and Hood Ornament)

EXTERIOR DECOR PACKAGE

Exterior Decor Package (ZY5) paint colors and trim are available only on single rear wheel Fleetside pickup models in a choice of eight combinations (see chart below). The package includes the moldings described under Special Two-Tone. In addition, it includes dual-tone body side and rear tape decal striping keyed to the exterior body color. This striping is applied to the front fenders, side doors and pickup box sides and tailgate a few inches above the styling crease line.

The areas above the striping and below the moldings are painted the primary paint color. The secondary color choice is used between the striping and the molding. A bright, spring-loaded, stand-up type hood emblem is also included.

When used with the Cheyenne or Silverado Model Options, the cab back panel applique and molding included with these models is deleted.

EXTERIOR DECOR PACKAGE—ZY5 FLEETSIDE ONLY (Includes YG1 and B96 Moldings and Hood Ornament)

The application of paint for solid and two-tone exterior color combinations is shown below.

SPECIAL BIG DOOLEY TWO-TONE PAINT—ZY9

(Requires E63 Body and R05 Dual Wheels)
Primary Body Color

Secondary Body Color

SPECIAL BIG DOOLEY TWO-TONE

Special Big Dooley two-tone (ZY9) paint colors are available only on Fleetside Pickup models with dual rear wheels in a choice of eleven combinations (see chart below). The package includes dual-tone body side and rear tape decal striping keyed to the exterior body color. This striping is applied to the front fenders, side doors and pickup box sides and tailgate a few inches above the styling crease line.

The areas above the striping are painted the primary paint color, and the areas below are painted the secondary color. A bright, spring-loaded, stand-up type hood emblem is included. Bright trim for front side marker lamps, rear wheel opening extension clearance lamps, and tail-lamps also is included for standard Custom Deluxe models.

When used with the Cheyenne or Silverado Model Options, the cab back panel applique and molding included with these models is deleted.

AXLES, SUSPENSION & STEERING

NEW FOR 1981

- C10 model front suspensions feature weight reduction measures for improved fuel economy.
- The 1981 rear spring line-up for Series CK10 and regulated Series CK20 models is revised for improved durability, better corrosion protection, and weight reduction.
- Highlighting suspension changes for 1981 pickups is the new RPO Z75 Front Quad Shocks Package for Series K10-20 models. This package consists of dual left and right hand 25 mm front shock absorbers, 32 mm diameter rear shock absorbers, and a front axle pinion nose bumper mounted on the right hand frame side member to limit front axle wind-up.

ADDITIONAL CHEVY VALUE FEATURES

Power Steering

- Helps to combat driver fatigue and aid maneuverability. It also dampens road shocks and vibrations at the steering wheel, providing extra comfort and ease of handling.

Locking Differential

- Combines unrestricted differential action during normal driving circumstances and complete, positive lockup upon slip of either wheel, in the forward or reverse direction.

Massive Girder Beam Independent Front Suspension (2 WD models only)

- Steel control arms
- Computer-selected friction-free coil springs
- Each wheel flexes up and down individually, steps independently over rough spots to help smooth ride
- Shielded shock absorbers.

Multi-leaf rear springs

- Provide a good ride with light loads, progressively firmer support as cargo weight increases
- Eyes and shackles rubber bushed to reduce noise and ride harshness
- Auxiliary rear springs also available on some models.

Shock Absorbers

- Counter-angled rear shock absorbers.

FRONT SUSPENSION

FOUR-WHEEL-DRIVE MODELS

SERIES K10, K20, K30

Front wheel drive on models K10-30 utilizes a single-reduction hypoid pinion and ring gear drive. At the outer ends of the axle are sealed preloaded ball joints and cardan-type universal joints with an open access which permits a 34-degree turning angle. This design permits turning in a smaller circle for maximum maneuverability. Servicing is simplified by the sealed ball joints which require no external lubrication. The ball joints also feature built-in dampening, which guards against wheel shake and shimmy that altogether improves handling qualities. A front stabilizer bar is standard. Tapered-leaf springs are used for the front suspension.

AUTOMATIC LOCKING FRONT HUBS

Automatic locking front hubs are standard on all K10-20 models. With this system, the front hubs will freewheel until the transfer case is shifted to four-wheel-drive. The resulting torque at the front hubs automatically locks them into four-wheel-drive. To return the front hubs to freewheeling, shift back into two-wheel-drive, reverse vehicle direction for ten feet, and torque at the hubs automatically shifts them back into the freewheeling mode. Shifting into two- or four-wheel-drive can be done at any speed up to 25 miles-per-hour.

FREEWHEELING FRONT HUBS

Freewheeling front hubs, standard on series K30 models, make it possible to manually disengage the front wheels from the front driveline when front wheel drive is not required. This leaves the front wheels free to rotate without "back drag" from the front axle and propeller shaft, eliminates unnecessary wear.

Engaged

Hublocks are engaged for 4-wheel-drive operation when the activator knobs are aligned with the grooved arrowhead pointing outward to the lock position. (If clutch teeth do not immediately engage when the knob is turned to this position, the first slight turn of the front wheel in either direction will complete the locking.) NO ROCKING IS REQUIRED!

Disengaged

To disengage the Hublocks, simply turn the activator knob so that it aligns with the grooved arrowhead pointing outward to the free position. Now the multiple teeth of the inner and outer clutch rings are separated and the wheels will turn free of the driving axle. The truck is now ready for conventional rear-axle driving.

TURNING CIRCLE DIAMETER

The specifications shown below apply to models with standard equipment only. Any change in axle, wheels or tires may result in a different turning diameter.

Dimension "R" is measured to edge of front tire at outside of circle, indicating diameter clearance needed at curb height.

Dimension "B" is measured to outer extremity of truck (front bumper or fender), indicating required wall-to-wall clearance diameter.

REAR AXLES

SINGLE-SPEED REAR AXLES 3500 and 3750-lb Capacity

Locking Differential

The rear axle locking differential, RPO G80, combines unrestricted differential action during normal driving circumstances and complete, positive lockup upon slip of either wheel, in the forward or reverse direction.

The differential utilizes a speed sensor, or governor, which triggers a cam system to apply a multiple disc clutch. After triggering, the clutch becomes self-energizing, which allows it to achieve complete lock providing maximum vehicle traction. This action occurs only when either rear wheel breaks traction and its speed exceeds the other by approximately 100 rpm, but only while vehicle speed is under 20 mph. Disengagement of lockup is automatic when tractive conditions are approximately equal under both wheels.

Under good tractive conditions, the unit operates as a completely free, standard differential. The need for special lubricants, as well as undesirable driveline noises, is eliminated.

At vehicle speeds above approximately 20 mph, the governor system is prevented from applying the locking clutch. Therefore, the unit always operates as a standard differential at normal road speeds.

The Chevrolet single-speed rear axle has rugged hypoid ring and pinion gears which have large tooth contact area for long, dependable service and quiet operation. Widely spaced tapered roller pinion bearings insure high pinion rigidity and long life of drive gears. The one-piece axle housing has a removable inspection plate to facilitate gear adjustment.

REAR AXLES

SINGLE-SPEED REAR AXLES 5700-lb to 11,000-lb Capacity

With full-floating design, the axle housing carries the weight of chassis and cargo. Axle shafts are only required to transmit driving torque to the rear wheels. Differential is of either two- or four-pinion type. Axle shafts are induction hardened to provide resistance to fatigue stresses.

With semi-floating design, the axle shaft supports the weight of the vehicle in addition to transmitting driving forces to the wheels.

Locking Differential

The rear axle locking differential, RPO G-80, combines unrestricted differential action during normal driving circumstances and complete, positive lockup upon slip of either wheel, in the forward or reverse direction.

The differential utilizes a speed sensor, or governor, which triggers a cam system to apply a multiple disc clutch. After triggering, the clutch becomes self-energizing, which allows it to achieve complete lock providing maximum vehicle traction. This action occurs only when either rear wheel breaks traction and its speed exceeds the other by approximately 100 rpm, but only while vehicle speed is under 20 mph. Disengagement of lockup is automatic when tractive conditions are approximately equal under both wheels.

Under good tractive conditions, the unit operates as a completely free, standard differential. The need for special lubricants, as well as undesirable driveline noises, is eliminated.

At vehicle speeds above approximately 20 mph the governor system is prevented from applying the locking clutch. Therefore, the unit always operates as a standard differential at normal road speeds.

REAR SUSPENSION

EL CAMINO MODELS

The 4-link rear suspension design of the El Camino models provides excellent ride and load-carrying characteristics. Two stamped channel-section lower control arms extend from brackets at each end of the axle housing to brackets at the start of the frame rail kick-up. Each control arm end pivots in compressed rubber bushings. Shorter stamped channel-section upper control arms

mount on brackets attached to the differential housing and extend diagonally outward to brackets on the intermediate Z-shaped frame crossmember to restrict lateral axle movement relative to the frame. Coil springs are positioned directly over the axle housing. Hydraulic direct double-acting air-booster-type shock absorbers are mounted diagonally behind the coil springs.

REAR SUSPENSION

**Typical Rear Suspension
without auxiliary spring
C10 Series shown**

Two-Stage Rear Springs

In a two-stage multi-leaf spring, the lower leaves become effective only when the vehicle is loaded and the upper leaves deflect sufficiently for the lower leaves to make contact. This increases the spring rate and, therefore, its load carrying ability.

The bottom tapered leaf has a cross section which varies almost continuously from a thick area of the pad to a thinner cross section at the outer ends. The loaded spring is therefore more uniformly stressed throughout its length.

In actual operation these springs adjust their stiffness to the load, giving a soft ride when the vehicle is empty and firm support when fully loaded.

Ride quality of the springs is enhanced with the selective use of plastic tip liners to reduce inner-leaf friction. Also, the spring eyes and shackles are rubber bushed, thus reducing noise and harshness.

**Typical Rear Suspension
with auxiliary spring

+ —Piston travel is 134.36 mm for all G11006 and G21005/06 models, and models G11005 and G21305/06 with heavy duty springs
 * — Except G31603/32 ♦ — Except P31832 @ — With School Bus Chassis Equipment ▲ — Pickup models without C6P
 † — Chassis-Cab model only ● — RPO Z75, Front Quad Shocks ▲ — Also required on P31432 @ 14,500-lb GVWR.

El Camino Rear Shock Absorbers Standard Equipment Air-Booster Type

El Camino load capacity is totally realized when the standard equipment air-booster rear shock absorbers are fully inflated.

Encircled by inflatable air chambers, these shock absorbers can be adjusted by varying the air pressure to meet different road and load conditions. Air pressure is varied through a tire-type air valve located inside the fuel filler door. From the air valve, air feed lines of durable nylon connect to each shock through a tee fitting which also serves as a balance line to equalize the pressure in each shock absorber chamber. The air chamber is independent of the internal shock mechanism, which assures normal control in event of accidental air pressure loss.

A minimum pressure of 10 to 15 psi (70 to 105 kPa) should be maintained at all times. After the vehicle is loaded, pressure may be increased until the rear of the vehicle returns to the normal designed riding height, but not to exceed 90 psi (620 kPa).

NOTICE: Do not use air-adjustable shock absorbers to raise the vehicle above the normal designed riding height, since this may cause severe damage to the shock absorbers or the vehicle mounting brackets.
