SOLID AND TWO-TONE* EXTERIOR COLOR COMBINATIONS

The application of paint for solid and two-tone exterior color combinations is shown below.

Solid Color (ZY1) paint is standard on all models. All painted areas of the body and front end sheet metal (except the cab roof and removable top) are painted the same color. The cab roof and removable top are painted either black or white.

Chevrolet model shown (GMC model available)

GMC model shown (Chevrolet model available)

Special two-tone (ZY3) paint colors are available on all models and include the YG1 molding package consisting of black vinyl body side and rear moldings with bright trim, bright wheel opening moldings, and bright trim for front side marker lights and tail lights (except with the YG3 molding package or the Silverado/Sierra Classic Model Option where bright body side and

rear moldings with black paint trim are substituted). The primary color is applied to the areas above the moldings (except roof areas). The secondary color is applied to the areas below the moldings. The cab roof, including the drip rails, and the removable top will be painted black or white as ordered. (See Interior and Exterior Color Availability Chart to determine cab roof and top color availability.)

Exterior Decor Package (ZY5) paint colors and trim are available in a choice of ten combinations (see Interior and Exterior Color Availability Chart). This package includes the moldings described under Special two-tone. In addition, it includes dual-tone body side and rear tape decal striping keyed to the exterior body color. This striping is applied to the front fenders, side doors and body sides and rear, a few inches above the styling crease line. The areas above the striping (except the cab roof and the removable top) and below the moldings are painted the primary color. The secondary color is used between the striping and the moldings. The cab roof, including the drip rails, and the removable top will be painted black or white as ordered. (See Interior and Exterior Color Availability Chart to determine cab roof and top color availability.) A bright spring-loaded, stand-up type hood ornament is also included on gasoline engine models.
