## **MOTOR HOME CHASSIS**

### **THE FOLLOWING EQUIPMENT IS STANDARD ON DIESEL ENGINE MODELS (ALSO SEE STANDARD SPECIFICATIONS PAGES)**

- Low Coolant Sensor
- Poly-wrapped Paper Element Air Cleaner
- Power Steering
- Engine Block Heater
- Water/fuel separator unit which incorporates a water sensor and sending unit, a fuel filter, a fuel heater and water drain capability
- Dual 550 Cold Cranking Amp/115 min. Reserve Capacity Batteries
- HD Radiator
- Dual Exhaust System
- Warning Lights: Glow Plugs, Water-in-fuel (or fuel filter), and Low Coolant
- Diesel Engine Identification:
  - Nameplates
  - "Diesel Fuel Only" filler cap and label

## **CHASSIS FEATURES**

# MOTOR HOME CHASSIS

## EXTERIOR FEATURES—STANDARD MODELS

The Standard models include the following items as standard equipment.

- **Color:** Chassis and components painted black
- **Emblem:** Bright Chevrolet/GMC letters (Furnished loose in parts box)
- **Front Frame Member:** Heavy channel reinforcement; painted black
- **Horn:** Single; low note; electric
- **Instruments:**
  - Gages: Speedometer, odometer, voltmeter, oil pressure, engine temperature and fuel
  - Switches: Main, for control of exterior lights and instrument lights; headlight beam (foot); ignition, direction signal with lane change position; and hazard warning
  - Warning lamps: service-parking brake, direction/hazard signal and high beam
  - NOTE: Ignition, direction signal, and hazard warning switches are installed; all other gages, switches and warning lamps are furnished loose in parts box*
- **Lights:** (Furnished loose in parts box)
  - Combination parking/direction/hazard
  - Headlamps: Two; Power Beam
- **Steering Wheel:** Six-position Comfortilt type; 16" diameter; 2-spoke, black soft vinyl
- **Tilt Steering Column:** Lever adjusting control (Six-position)
- **Wheels:** Painted white

## STANDARD MODEL—BODY ORDERING CODE—ZW9

The standard model includes the following items as standard equipment

Chevrolet model shown (GMC model available)

### INTERIOR

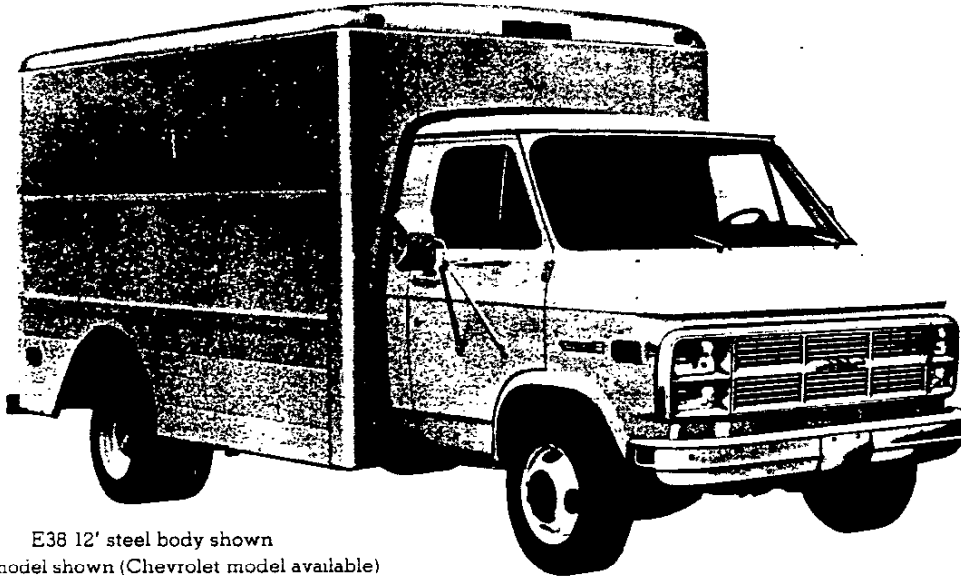

- **Air Vents:** RH and LH; individually controlled
- **Armrest:** LH side door; padded
- **Ashtray:** At top of instrument panel extension; with door
- **Cigar Lighter:** RV Cutaway Van/Rally Camper Special models only; includes ash tray light
- **Colors:**  
Painted areas: Same as exterior primary color choice  
Interior trim: Coordinated with seat trim color choice
- **Dome Lamp:** In front compartment area.
- **Door Locks:** Inside pushbutton lock/release
- **Door Seals:** Latex foam rubber
- **Floor Covering:** Embossed black rubber mats on entire front floor area and wheelhousings
- **Headliner:** Mystic colored perforated hardboard with insulator (except Model G31332)
- **Heater and Defogger:** Deluxe-air
- **Hood Lock Release:** Handle located on LH side of instrument panel
- **Instruments:**  
Gages: Speedometer, odometer, and fuel (Model G31632 RV Cutaway Van/Rally Camper Special also has voltmeter, oil pressure gage, and engine temperature gage)  
Switches: Main, for control of exterior lights, dome light and instrument lights; multi-function switch on steering column for direction signals by moving lever up or down (includes lane change position), headlight beams by pulling lever toward driver, windshield wiper by turning band marked "WIPER" toward or away from driver, and windshield washer by pushing in the lever knob; ignition with key-in warning buzzer; hazard warning; heater fan; door-operated dome light (except Model G31332)

- Warning lights: Generator, oil pressure, engine temperature (except Model G31632—see "gages" above), service-parking brake, direction/hazard signal, and high beam
- **Instrument Panel:** Bright trim on gage bezels; black applique with bright trim on area below instrument cluster
- **Insulation and Sound Deadening Material:** Dash (firewall), entire front floor panel (except wheelhousings), inside engine cover, on engine cover front extension and under headliner (except Model G31332)
- **Lights:** Instrument and dome (except Model G31332)
- **Main Light Switch Control Knob:** Bright, with brushed finish and black graphic identification
- **Mirror, Rearview:** 10" prismatic with soft vinyl rim
- **Parcel Tray:** On top surface of instrument panel extension; includes beverage holder provisions
- **Safety Step Pads:** Front door step panels
- **Seat:** Front bucket, driver; all-vinyl trim; foam padded, adjustable. Also available at extra cost: High back driver and passenger seats in standard vinyl or custom vinyl. See Interior and Exterior Color Selection Chart for color and trim availability
- **Seat Belt:** Color-keyed with pushbutton release and outboard retractor
- **Steering Wheel and Column:** 15.25" diameter black soft vinyl wheel with 2 spokes; black energy-absorbing steering column with anti-theft locking feature
- **Storage Box:** In front face of instrument panel extension; with door
- **Sunshades:** LH padded, color-keyed
- **Trim Panels:** Painted metal with decorative embossments; front side doors

## Paint Applications

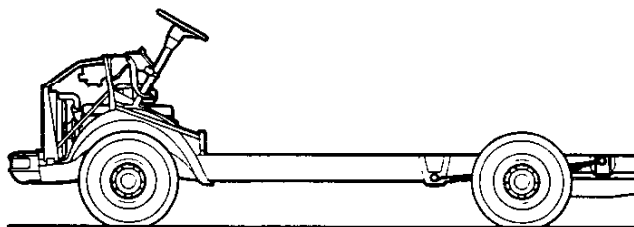

**Solid Color** paint (ZY1) is standard on Cutaway Vans and on steel Hi-Cube Van/Magnavan models and is available on aluminum Hi-Cube Van/Magnavan models. All painted areas of the cab or cab and van body are painted the same color.

**Two-Tone** paint treatment (ZY2) is available on aluminum Hi-Cube Van/Magnavan models only. The cab is painted the selected primary color, and the aluminum van body is *unpainted*, bare aluminum (secondary color code 02 must be specified).

## **STEP-VAN/VALUE VAN**

### **THE FOLLOWING EQUIPMENT IS STANDARD ON DIESEL ENGINE MODELS (ALSO SEE STANDARD SPECIFICATIONS PAGES)**

- Low Coolant Sensor
- Poly-wrapped Paper Element Air Cleaner
- Auxiliary Engine Oil Cooler (in addition to cooler in radiator tank) provided with 5.13 or 5.29 ratio rear axle on P30/3500 models only
- Power Steering
- Engine Block Heater
- Water/fuel separator unit which incorporates a water sensor and sending unit, a fuel filter, a fuel heater and water drain capability
- Hydraulic Power-assisted Brakes
- K81 66-amp Generator
- Engine Oil Cooler (located in radiator tank)
- Dual 550 Cold Cranking Amp/115 min. Reserve Capacity Batteries
- HD Radiator
- Dual Exhaust System
- Additional Insulation (on Van models only):
  - Special engine housing cover with triple layer inner insulator and single piece rubber floor seal
  - Fiberglass dash mat
  - Black rubber mats on dash and floor panel
  - Perforated driver compartment headliner with fiberglass backing
  - Fiberglass front quarter panel insulation
  - Additional body sealing measures
- Warning Lights: Glow Plugs, Water-in-fuel (or fuel filter), and Low Coolant
- Diesel Engine Identification:
  - Nameplate on rear door
  - “Diesel Fuel Only” filler cap and label

# STEP-VAN/VALUE VAN OR F.C. CHASSIS (6800-lb - 10,000-lb GVW)

For P3 Series equipped with 11,000-lb rear axle or B3D see pages entitled:

\*P3 SERIES STEP-VAN/VALUE VAN AND F.C. CHASSIS (12,000-lb-14,000-lb GVW) or P3 Series F.C. Chassis with B3D School Bus Chassis  
(11,500-lb-14,500-lb GVW)\*

  - Moldings: Bright

### ALUMINUM STEP-VANS/VALUE VANS

In addition to those items listed on the preceding page for all Step-Vans/Value Vans, the following items are also standard equipment:

- **Body Panels and Framing:** Aluminum
- **Grille Area:**
  - Grille Panel: Aluminum
  - Grille Panel Openings: Aluminum
  - Headlamp—Parking Lamp Bezels: Bright brushed aluminum
- Moldings: Bright

ALUMINUM STEP-VAN/VALUE VAN

## INTERIOR FEATURES—STANDARD MODELS

The standard models include the following items as standard equipment

### ALL STEP-VANS/VALUE VANS

- **Air Vent:** Integral with Deluxe-air heater and vent with door on driver's side
- **Colors:** Driver area painted with Dark Blue non-reflective paint; area covers entire front-end interior in driver's line of vision. Remainder of interior painted Silver Gray (steel vans only)
- **Door Locks:** Inside lever lock/release
- **Engine Access Cover:** One piece molded fiberglass cover is held down by two rubber T-handles and catches and is entirely removable; with fiberglass insulation and rubber edge seals
- **Heater and Defogger:** Deluxe-air; two speed blower
- **Instruments:**
  - Gages: Speedometer, odometer, fuel, voltmeter, oil pressure, and engine temperature
  - Switches: Main, for control of exterior lights; instrument lights; front and cargo compartment dome lights; wiper-washer; headlight beam (foot); ignition; direction signal with lane change position; hazard warning; and heater fan
- **Warning lights:** Service-parking brake system; direction/hazard signals, and high beam
- **Interior Lights:** Instrument, front and rear compartment dome operated by main light switch
- **Parcel Tray:** Top of engine housing with raised edge
- **Seat:** Individual driver, foam padded, Dark Red grained vinyl; pedestal-mounted, fold-forward type; pedestal lock secures seat in driving position; fully-adjustable: forward, backward, up, or down
- **Seat Belt:** Includes belt holder loops on seat frame; pushbutton release
- **Steering Wheel:** 16" diameter; 2-spoke; black soft vinyl
- **Visor:** Driver's side, 8" x 10" tinted plexiglass, adjustable

STEEL STEP-VAN/VALUE VAN

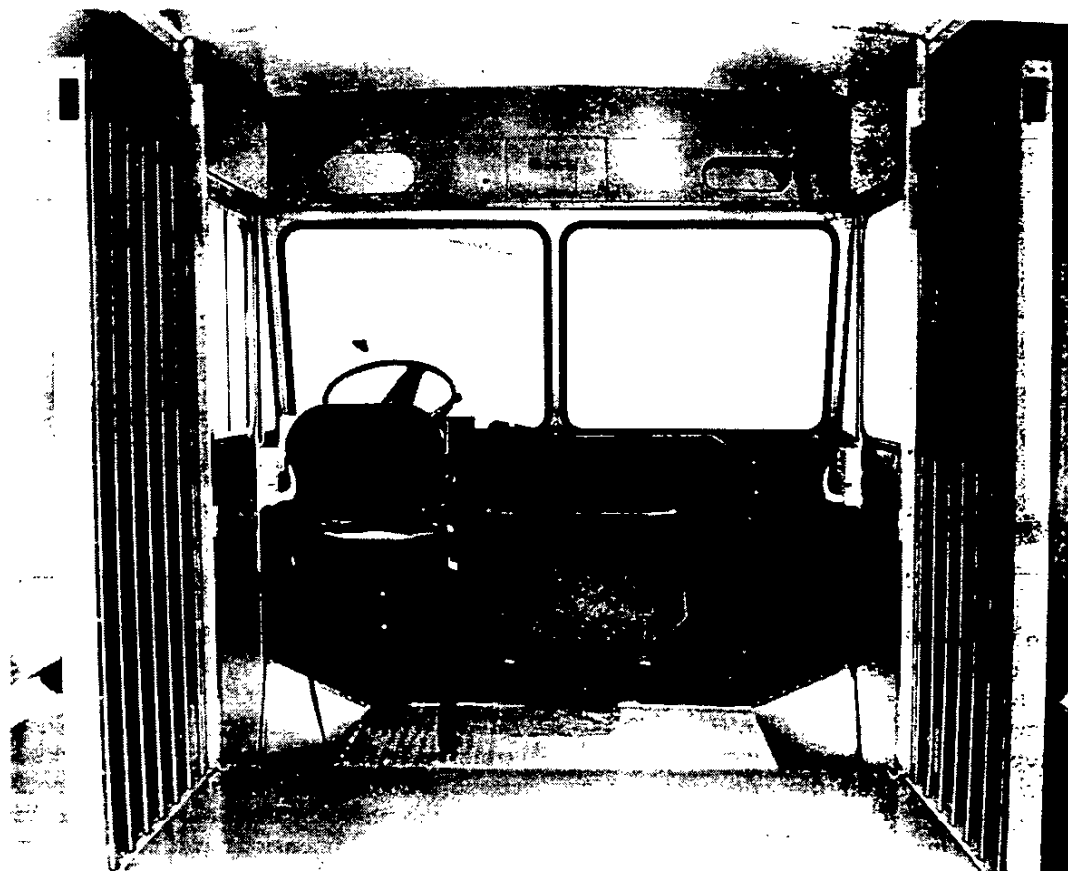

### STEEL STEP-VAN/VALUE VAN

In addition to the items listed above for all Step-Vans/Value Vans, the following items are also included

- **Door Seals:** Molded rubber; forward edge of front doors
- **Floor Area:**
  - Driver floor: Smooth steel
  - Floor between seat and load area and stepwells: Steel treadplate
  - Load area: Corrugated 18-gage steel
- **Inner Trim Panels:** Covers inner side walls, rear end, and entire roof area (ribbed steel on sidewalls, smooth on roof)
- **Insulation and Sound Deadening Material:** Between outer and inner panels, the area is lined with 1" fiberglass; engine access cover underside fully insulated with fiberglass

## INTERIOR FEATURES—STANDARD MODELS

ALUMINUM STEP-VAN/VALUE VAN

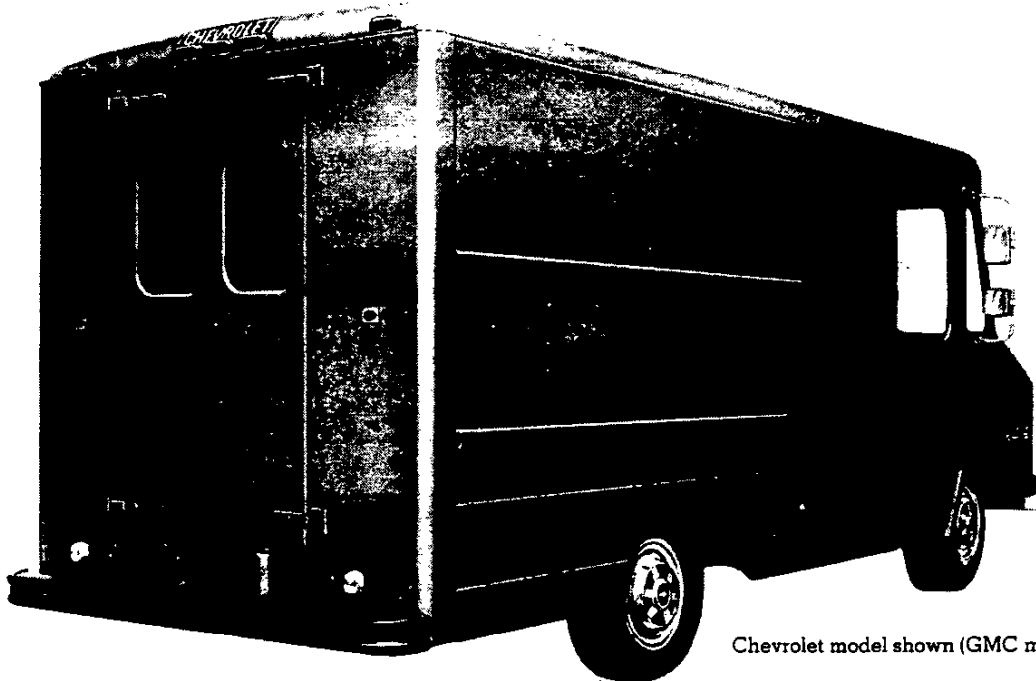

### ALUMINUM STEP-VAN/VALUE VAN

In addition to the items listed for all Step-Vans/Value Vans on the preceding page, the following items are also included:

- **Door Seals:** Foam rubber; recessed in the extrusion at the front of the side door opening; compresses against the front edge of the side door when door is closed
- **Floor Area:**
  - Driver area: Smooth steel
  - Load area: Smooth aluminum
  - Floor between seat and load area and stepwells: Aluminum treadplate
- **Inner Roof Trim Panel:** Embossed aluminum; covers entire roof area
- **Insulation and Sound Deadening Material:** Between outer and inner roof panels the area is lined with 1" fiberglass; engine access cover underside fully insulated with fiberglass
- **Side Sliding Door Guide:** Aluminum extrusions; mounted on bottom of door opening; contains polypropylene inserts to guide opening of door; provides weather seal and eliminates door rattles
- **Side Sliding Door Pockets:** Corrugated rigid aluminum; completely encloses door when opened

# STEP-VAN/VALUE VAN

## STEP-VAN/VALUE VAN—STEEL GENERAL FEATURES

Chevrolet model shown (GMC model available)

Step-Van/Value Van models are available in three standard nominal lengths of ten feet six inches, twelve feet six inches and fourteen feet six inches. The fourteen-foot six inch model is available only in the 30/3500 Series. All Step-Van/Value Van steel bodies feature rugged welded and bolted all-steel construction for maximum strength.

Front and rear side marker lights and roof-mounted identification and clearance lights are provided as stan-

dard equipment, mounted below the roof line for protection. Left- and right-hand dual-head outside rearview mirrors and rear door glass are also standard.

One-piece steel bathtub-type front wheelhousings help to protect the body from corrosion, and thick steel radiator supports help to strengthen overall structural rigidity.

See the chart on the Step-Van/Value Van dimension page for dimensions and cubic capacities of all the bodies.

## SERVICE FEATURES

GMC model shown  
(Chevrolet model available)

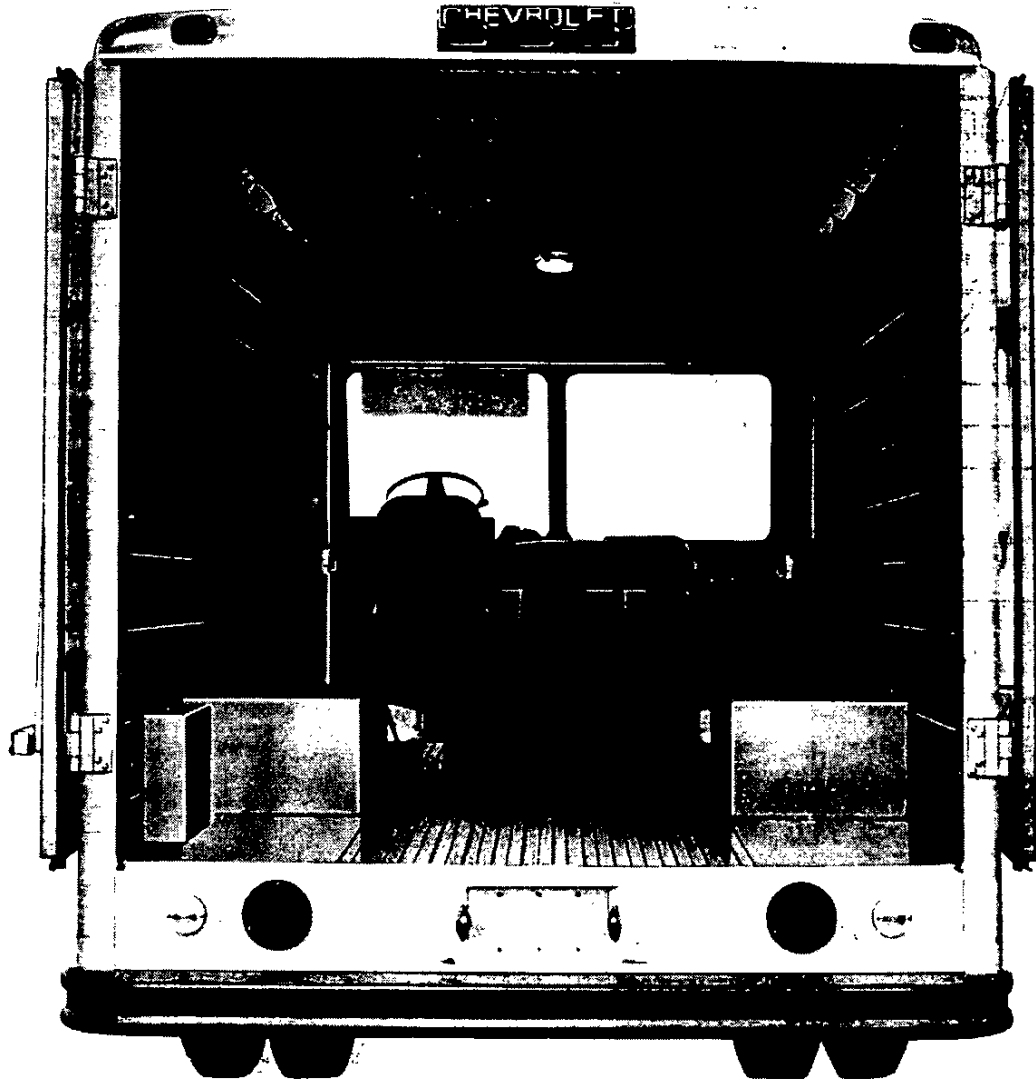

The design features a front opening hood for better service access to the engine, battery, radiator, and other chassis items.

*Note: See white tabs Special Equipment for Union City Bodies and Special Equipment Options for a listing of special items.*

## STEP-VAN/VALUE VAN

### STEP-VAN/VALUE VAN—STEEL

#### BODY FEATURES

Steel panels line the body interior, providing a smooth surface that is both durable and practical. One inch thick fiberglass pads are used between the inner and outer panels of the sides, rear end and roof for sound deadening and insulation against heat and cold. The load compartment floor is constructed of 18-gage steel with corrugated center panel for rugged strength and ease in sliding loads in and out. The wheelhousings are rectangular for simplicity when loading all around them. A smooth floor of 11-gage steel is also available optionally.

The double-wall constructed sliding front doors are completely enclosed in door pockets when opened, which prevent objects from wedging or interfering with their sliding operation. An outside key lock is provided for the passenger side door. The glass in the driver side door is the aluminum-framed sliding type while the passenger side has fixed glass. Sliding glass is available for this window as an option.

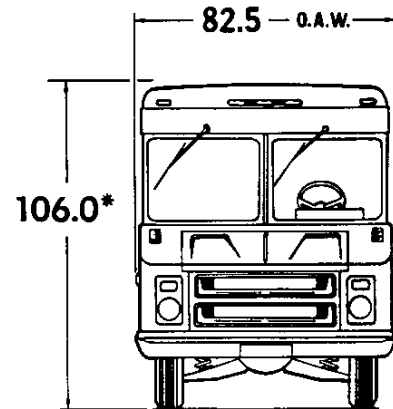

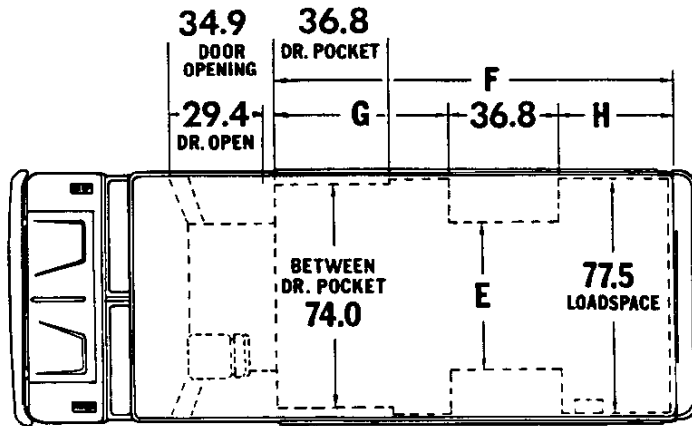

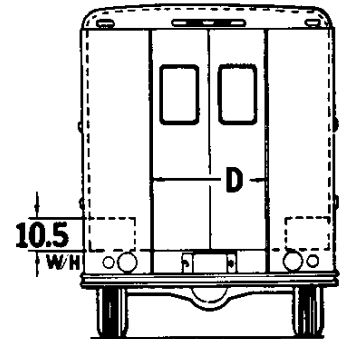

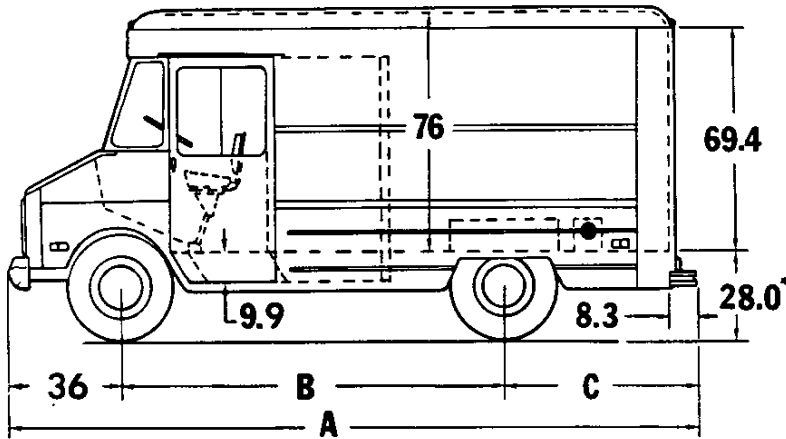

The rear bumper has a treadplate type upper surface to give safer footing while climbing in and out of the load space.

Double rear doors with a window in each and a total width of 38" are standard. The right-hand door has an inside latch which engages at both the top and bottom and can be operated either by an inside handle or an outside key-locking handle. The left hand door has an inside latch at the top. Optional rear doors include double rear doors similar to the standard ones, but with a 60" width. Also available is a 74" wide wrap-around door option with strap hinges. Extensive corrosion protection measures are employed, including use of corrosion-resistant steels, special sealers, corrosion-resistant coatings or fasteners, and underbody coatings.

\*This dimension varies depending on spring, tire and wheel size.

## STEP-VAN/VALUE VAN

### STEP-VAN/VALUE VAN—ALUMINUM

#### GENERAL FEATURES

GMC model shown (Chevrolet model available)

Step-Van/Value Van Aluminum models are available in standard nominal lengths of ten feet six inches and twelve feet six inches on P20/2500 Series and ten feet six inches, twelve feet six inches, and fourteen feet six inches on P30/3500 Series. Body construction is of aluminum extrusions forming a rigid integral framework, covered with riveted heavy-gage aluminum panels which can be removed for repair or replacement if damaged. The light weight and freedom from rust offer more efficient transport of goods and lower body maintenance costs. Payload capacity is greater than that of a comparable steel van.

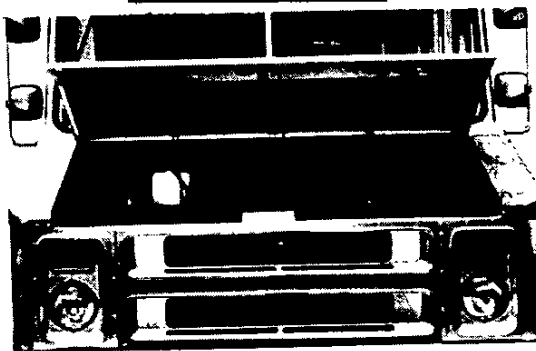

All Step-Van/Value Van Aluminum models feature square front end styling with a front opening hood for better engine access. Front and rear side marker

lights, roof-mounted identification and clearance lights are standard as are left-hand and right-hand outside dual-head rearview mirrors and rear door glass.

One-piece steel bathtub-type front wheelhousings help to protect the body from road splash, and a one-piece steel radiator support helps to strengthen overall structural rigidity. The hood panel is thick aluminum with liberal reinforcement by especially designed extrusions, and is secured by a two-position plunger automotive type latch.

Optional increases in width and height are available, either separately or in combination with each other, making a total of six possible body sizes on each wheelbase. See the chart on the dimension page for dimensions and cubic capacities of all the bodies.

#### SERVICE FEATURES

Chevrolet model shown  
(GMC model available)

The design features a front opening hood for better service access to the engine, battery, radiator and other chassis items.

*Note: See white tabs Special Equipment For Union City Bodies and Special Equipment Options for a listing of special items.*

# STEP-VAN/VALUE VAN

## STEP-VAN/VALUE VAN—ALUMINUM BODY FEATURES

Embossed aluminum headlining with 1" insulation is standard. Driver's compartment header trim panels with access plates provide a finished appearance without reducing service ease. Unobstructed load space features rectangular wheelhousings for simplicity in loading. The load compartment floor is smooth for ease in sliding loads in and out.

The solid laminate sliding front doors are completely enclosed in rigid corrugated door pockets when opened, which prevent objects from wedging or interfering with their sliding operation.

An aluminum-framed sliding window is standard in the driver's side door, while the passenger's side has fixed glass. Sliding glass is available for this window as an option.

The steel rear bumper has a treadplate-type upper surface to give safer footing while entering or leaving the load space.

Double rear doors with a window in each and a total width of 38" are standard. The left-hand door has an inside latch at the top, while the right-hand door utilizes a latch which engages at both the top and bottom and can be operated either by an inside handle or an outside key-locking handle. Heavy-duty hardware is standard and both the right side and rear doors have outside key locks keyed alike. Rugged heavy-duty strap hinges are also standard.

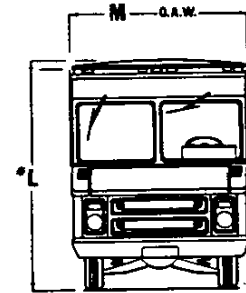

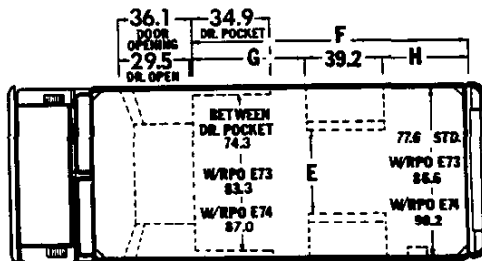

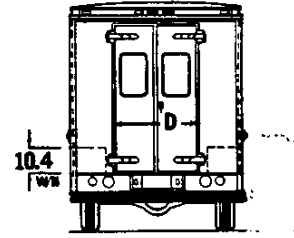

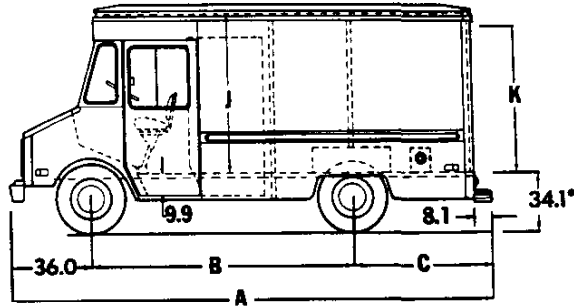

Optional rear doors include double rear doors similar to the standard doors but with a 60" width. Also available are three wrap-around door options in widths of 74," 83," and 87." The 83" door option is available only with the optional 9" additional body width, while the 87" door option is available only with the optional 13" additional body width.

The underside of the body, front and rear wheelhousings, and side panels below floor level are fully undercoated.

# STEP-VAN/VALUE VAN

## STEP-VAN/VALUE VAN BODY CONSTRUCTION

### STEEL BODIES

The Step-Van/Value Van Steel bodies consist of six major fabricated assemblies; the front end, floor, right and lefthand sides, roof, and rear end. Each of these assemblies consists of a rigid framework of heavy, stamped structural members with the outer skin panels joined to them by welding. The six major assemblies are positioned in massive welding fixtures that align and hold all structural members and panels rigidly and accurately to insure uniformity during final welding and assembly.

Prior to final assembly the sub-assemblies are run through a three-stage acid, phosphate and water wash to remove oil and prepare the surfaces for painting. Any areas which will be hidden during the assembly process are then primed, which includes most of the inner surfaces and the underfloor structure.

To resist corrosion, extensive use is made of weld-through primers and all coach seams and joints are thoroughly sealed. The exterior body panels, front

stepwells and rear wheelhouses are fabricated of iron-zinc alloy steel, and the chassis splash fenders are integrated into the front end structure to afford additional protection from road splash. Corrosion-resistant coatings are used on fasteners, with cadmium-plated rear door strap hinges.

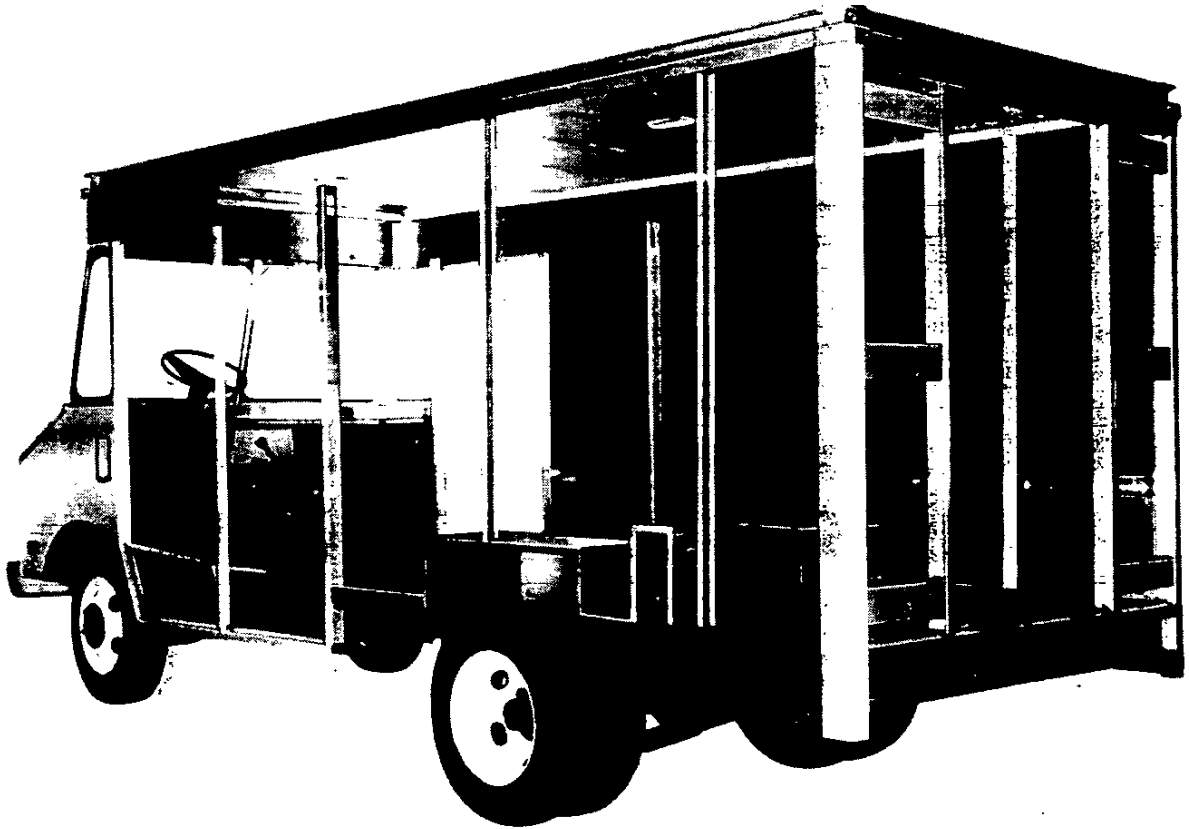

The major body assemblies are then mounted on the chassis, and are joined by bolting, welding and riveting. Mastic is applied to the inside of the body shell and one inch-thick fiberglass mats applied in the roof, sides and rear end. Steel interior trim panels are primed on both sides before installation.

The Step-Van/Value Van body is then primed and baked in a two-stage oven before the finish coat is applied. The interior is finished in grey hammertone and the exterior is finished in highgloss enamel and are again baked in two-stage ovens. The underbody is then undercoated in its entirety, and rustproofing compound applied to the interior and side doors to inhibit corrosion.

# STEP-VAN/VALUE VAN

## STEP-VAN/VALUE VAN

### BODY CONSTRUCTION

### ALUMINUM BODIES

The Step-Van/Value Van Aluminum with aluminum body features complete framing of the body with aluminum extrusions. All extrusions are joined, by riveting or welding, to form an extremely rigid integral framework. These extrusions are designed for their specific application.

Special alloy body panels are riveted to this extrusion framework and can be removed for repair or replacement.

The aluminum load floor panels are smooth. Wheelhousing structure is of heavy aluminum sheet reinforced and welded together to form a strong rectangular box. Floor panels are welded to transverse cross-sills of sturdy hat-shaped aluminum extrusions, with the wheelhousings riveted into the assembly. Cross-sill spacing is closer at the rear of the loadspace floor, where loading impacts are greatest.

The front end structure consists of specially designed aluminum extrusions, riveted and welded together to form a rugged framework. The outer skin of aluminum sheet is riveted to the frame structure. The front opening hood is reinforced aluminum. The driver's compartment floor rearward of the seat and step area of the stepwells are of aluminum treadplate.

The sides are of frame and skin construction. Special alloy aluminum sheet panels are riveted to the extrusion framework, wheelhousings, floor, and a sturdy half-round crash rail to form rigid structures.

The roof is built around symmetrical side, front and rear extrusions. At each corner the extrusions bolt to castings designed to fit this complex shape. The outer skin is a flat sheet which is rolled over the extrusion flanges around its outer edge, with all rivets being outside the roof structure to prevent leaks. Transverse roof bows of H-shaped extrusions provide support for the outer skin.

The rear end is a riveted and welded assembly of aluminum panels and heavy-duty extrusions. The rear door frames are special complex shaped extrusions, miter cut and welded. Thick aluminum exterior panels are riveted to these frames, and inner reinforcements support door hinges and hold-open stops.

A sturdy steel transmission cross-sill assembly and one-piece steel bathtub front wheelhousings are shared with the steel Step-Van/Value Van and afford even greater rigidity and protection to the front end assembly.
