Additional Information on Significant Features

- S-Blazer offers standard **4-Wheel Anti-Lock Brakes**, which reduce the chance of wheel lockup helping driver maintain control during severe braking. When wheel sensors detect an impending lockup, the control unit modulates brake pressure to the appropriate brake lines, helping to improve steering control even on slippery surfaces.
- **Two-Stage Variable-Rate Multi-Leaf Springs** on the rear suspension provide an excellent ride for passengers under light loads, yet under heavy loads springs compress to the second stage to provide strong support capability.
- Chevrolet's **Insta-Trac System** allows shifting from 2WD to 4WD High and back while driving at any speed. Unlike some systems where the vehicle must be stopped, and even driven backwards to fully disengage the front-drive system, Insta-Trac just requires moving the floor mounted lever, or pushing the optional dash-mounted switch (RPO NP1) at any speed.

Deletions

- Cast-aluminum wheel (Honeycomb pattern RPO N60) is no longer offered on 2WD models due to low demand.
